About Us

We are Protect-MV, a Spanish company in several sectors with a succesful product that we would like to export to other markets. We are looking for distributors with a commercial network or sales representatives with some local knowledge.

It is a Protector Device for Food, Plants and Flowers -all types of Agriculture-, a tool for conservation and controlling humidity, combating all types of higienical problems, [insect pests](#) and the inclemency of the weather.

It has unique advantages which is the reason why it has been internationally patented with a PCT and it has won some international awards as well.

Its physical properties make the Protector Device a little greenhouse. All these reasons have contributed to the success of our Device; a product based on the simplicity and low cost.
