Trade Detail

CAS No. 302-17-0

Molecular weight 165.4

Molecular formula $\text{CCl}_3\text{CH}(\text{OH})_2$

Appearance White crystal,easy evaporate in the air and soluble in the water,ethanol,ether,glycerin,acetone,olive oil and so on.low-grade soluble in benzene,etc

Assay(%) ?99%

PH 3.5~6.0

chloride ?0.01%

melting point 57?

Level of addition(mg/l) 10-100

burning residue ?0.1%

Application 1.For electroplating industry used to adjust the electronic potential difference in semi-bright nickel plating;it can affectively remove the active sulfur in the bath,and improve the electronic potential difference.

2.For pharmacy,it can be used as a hypnotic drug and anti-eclampsia drug.

3.For agruculture,it can be used as intermediate of herbicide and other kinds of pesticides.
